

A B S T R A C T

The composition includes a chlorinated polyolefin grafted by an amino-silane to enable it to be cured in
5 air. The composition contains a basic mixture including,
for 100 parts by weight of said chlorinated polyolefin,
100 to 250 parts of a filler containing moisture and an
agent for treating said filler, and said amino-silane is
grafted to said chlorinated polyolefin of said basic
10 mixture during extrusion of the composition. The
composition is useful in insulating and sheathing cables.
